

The CAR T Cell Therapy Appointment Tracker

Although CAR T cell therapy is a one-time infusion, there are many steps in the treatment journey which take place over several weeks. This treatment calendar may help you visualize your journey and keep track of your appointments and major milestones.

Consider the following when using this calendar:

Appointment	Description	Typical Duration*
 Consultation & Testing	Talk with your doctor about CAR T cell therapy; some tests may be scheduled before proceeding	 1-2 weeks
 Blood Collection	In a process called "apheresis", your blood is drawn and T cells are collected	 2-5 hours
 While You Wait	You may receive interim treatment while your CAR T cells are being manufactured	 2-5 weeks
 Lymphodepleting Chemotherapy	Prepare your body for CAR T cells	 3-4 days
 Infusion	Receive your CAR T treatment. Your doctor will decide whether this will be inpatient or outpatient	 ≥1 hour
 Post-Infusion: Short-Term Follow-Up	Monitoring and treatment of any side effects by your CAR T care team near the CAR T treatment center	 ≥4 weeks
 Post-Infusion: Long-Term Follow-Up	Follow-up appointments, disease and side-effect monitoring with your local doctor or CAR T treatment team	 Years
